Olaoluwa Abiodun

Full Stack Web Developer || TypeScript || React || Next || Express ||
PostgreSQL

Ibeju Lekki, Lagos State, Nigeria

Summary

I'm a Full-Stack Web Developer with a background in Physics, having recently graduated with a degree in Industrial Physics with Renewable Energy from Covenant University. My technical skills focus on building dynamic, user-centric web applications using technologies like TypeScript, React, Next.js, Node.js, and PostgreSQL. I'm currently leading Rexara Digital and developing its flagship product, Rentyx, an all-in-one rental property management ERP platform for real estate managers. My interest extends to power generation, transmission, and distribution, which aligns with my studies and reflects my passion for both technology and the energy sector.

Experience

Freelance

Full Stack Developer

May 2024 - Present (6 months)

As a Fullstack Web Developer, I specialize in building dynamic and responsive web applications using a modern JavaScript stack. My expertise includes:

- NextJS Development: Ability to utilize the NextJS framework to create a fully integrated and intuitive full stack application using react and the nextjs app router api routes for business logic.
- Frontend Development: Utilizing React for creating interactive user interfaces and CSS for designing visually appealing and user-friendly layouts.
- Backend Development: Employing Node.js and Express.js to build robust and scalable server-side applications.
- Database Management: Managing data storage and retrieval using PostgreSQL to ensure efficient and secure data handling.

Notable Project: DevLinks

- Built a dynamic platform allowing developers to create and manage personalized profiles featuring links to their projects, social media, and portfolios.
- Integrated drag-and-drop functionality for easy link reordering, edit capabilities, and a responsive user interface to ensure seamless accessibility across devices.
- Developed an authentication system and set up an admin demo account to showcase the platform's features.
- Focused on creating an efficient, interactive, and user-friendly experience that integrates smoothly between frontend and backend components.

This project further honed my skills in fullstack development, emphasizing clean code practices, responsive design, and feature-rich implementations.

Notable Project: Notemaster Web App for Writers

- Developed a comprehensive web application tailored for writers to manage their notes and projects, while tracking data and offering recommendations based on each user's specific writing habits in order to improve productivity and prowess.

This role has allowed me to enhance my skills in fullstack development, tackle challenging problems, and deliver high-quality solutions to clients.
